# Investment Update

Lifestages KiwiSaver Scheme Lifestages Auto Option age 65+\* for the quarter ended 30 June 2024

This investment update was first made publicly available 26 July 2024

## What is the purpose of this update?

This document tells you how the Lifestages Auto Option age 65+ has performed and what fees were charged. The document will help you to compare the investment option with other investment options and funds. Funds Administration New Zealand Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

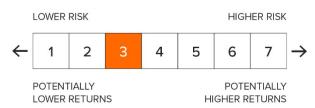

## **Description of this fund**

This life cycle investment stage invests 30% in the Lifestages High Growth Fund and 70% in the Lifestages Income Fund, which is regarded as providing appropriate levels of risk and return for a person aged 65+.

\$7,746,940

14 October 2015

## What are the risks of investing?

Risk indicator for the Lifestages Auto Option age 65+:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at

## www.sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of an investment option's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future investment updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this investment option.

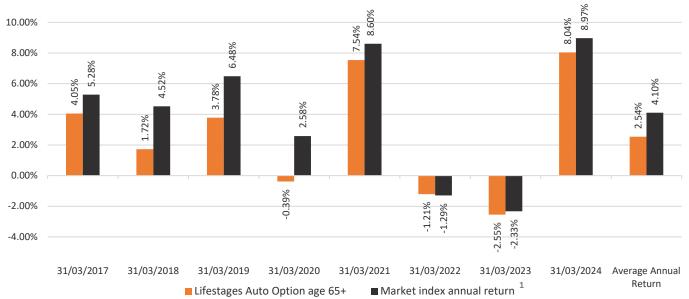

## How has the investment option performed?

	Average over past five years	Past year
Annual return (after deductions for charges and tax)	1.83%	6.42%
Annual return (after deductions for charges but before tax)	2.66%	7.72%
Market index annual return (reflects no deductions for charges and tax)	2.70%	7.53%

The market index annual return is based on a composite index, calculated using the target investment mix weightings of the underlying market indices that the investment option invests into. The benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO).

Additional information about the market index is available in the SIPO on the offer register (search for Lifestages KiwiSaver) at **www.disclose-register.companiesoffice.govt.n**z.

## **Annual Return Graph**

This shows the return after fund charges and tax for each year ending 31 March since the investment option started. The last bar shows the average annual return since the investment option started, up to 30 June 2024.

**Important:** This does not tell you how the investment option will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Lifestages Auto Option age 65+ are charged fund charges. In the year to 31 March 2024 these were:

% of net	asset value
Total fund charges (estimated)	0.95%
Which are made up of -	
Total management and administration charges	0.95%
Including -	
Manager's basic fee	0.59%
Other management and administration charges $^{\rm 2}$	0.36%
Total performance-based fees	0.00%

Other Charges	Dollar amount
	per investor
Member fee	\$0.00

The percentage shown for the 'Other management and administration charges' includes an estimate of the fees and expenses incurred in the underlying funds in which the investment option invests. Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the 'Other Material Information' document for the Lifestages KiwiSaver Scheme on the offer register (**www.discloseregister.companiesoffice.govt.nz**) for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

## Example of how this applies to an investor

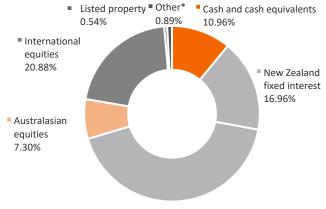

Hayley had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Hayley received a return after fund charges were deducted of \$772 (that is 7.72% of her initial \$10,000). This gives Hayley a total return after tax of \$641.70 for the year.

## What does the investment option invest in?<sup>3</sup>

This shows the types of assets that the investment option invests in.

#### Actual investment mix

International fixed interest 42.47%

## **Top 10 investments**

## **Further information**

You can also obtain this information, the PDS for Lifestages Auto Option age 65+, and some additional information from the offer register at www.disclose-register.companiesoffice.govt.nz.

## Notes

- <sup>1</sup> Note that market indices reflect no deduction for charges and tax.
- <sup>2</sup> This covers expenses incurred in running the fund (e.g. accounting, audit, and regulatory compliance costs). This also covers the Supervisor's annual fee (for the services it provides) and an estimate of fees and expenses incurred by the underlying funds. GST will be included in some expenses, where applicable. Our estimates are made on the basis of reasonable assumptions about the ongoing level of fees and costs expected to be charged (taking into account the actual fees and costs as a percentage of average net asset value that were charged for the most recent scheme year). These fees are deducted from, and reflected in the unit price of the fund.
- <sup>3</sup> The investment option invests 30% in the Lifestages High Growth Fund and 70% in the Lifestages Income Fund. The actual investment mix, target investment mix, top 10 investments and currency hedging all reflect the assets invested proportionally in these Lifestages Funds.
- \* The asset allocation of this investment option, and thus the fund description, changed in December 2022.
